

# Weight Ballasts

## ■ Weight Bar Kit

Chassisworks' weight bar kit provides a time-saving, compact, simple and safe way to add weight to your race car to meet class regulations. The 35 lb., billet-steel bar is completely solid. Overall volume and weight is very similar to shot-filled lead ballasts. The Chassisworks' weight bar measures 3 x 2 x 20.9" and uses a broad 16" bolt pattern. Included mounting sleeves weld into 1-5/8" - or 1-1/4" -diameter chassis tube to securely mount the bar with 1/2" Grade 8 hardware.

6405	35 LB. WEIGHT BAR AND MOUNT KIT	\$189.00
------	---------------------------------	----------

## ■ Weight Puck Kit

Six individual 5-lb. weight pucks can be easily added or removed to compensate for differences in track scales (30 lb. total). Weight pucks feature an interlocking dished design and are secured together using 3/8" Grade 8 hardware. The billet mount welds onto a 1-1/4" to 1-5/8" -diameter chassis tube.

6404	5 LB. WEIGHT PUCK AND MOUNT SET (6 PUCKS, 30 LB.)	\$229.00
6406	SINGLE 5 LB. WEIGHT PUCK AND HARDWARE	42.00
