

g-Machine Anti-Roll Bars with Spherical-Bearing End Links for g-Machine A-Arms

g-Machine Anti-Roll Bar for g-Machine A-Arms

Our street/track performance g-Machine anti-roll bar offers substantially increased stiffness and flatter cornering over our standard Street-Machine component. Kits are designed for Chassisworks direct-fit Camaro and Chevy II or custom 30" and 33" g-Machine crossmember systems equipped with g-Machine A-arms. Anti-roll bars are 1 x .188"-wall or 1-1/4 x .375"-wall, 4130 chrome-moly tubing with relatively short lever arms to achieve superior performance to solid 1-1/8" to 1-1/4" factory replacement bars at a fraction of the weight. To guarantee correct component clearance and end-link geometry, bars are bent on our fully automated CNC bender to precisely fit each g-Machine crossmember. Threaded adapters, welded at each end, provide increased end-link misalignment clearance and accept 3/8" socket-head bolts. Teflon® race, spherical-bearing, end-link assemblies create deflection-free pivot points with minimal-resistance pivot and enable the anti-roll bar's effects to be immediate, more linear, and predictable. End-link length is also adjustable to eliminate static preload and ensure balanced handling. Polished, billet aluminum clamps mount the anti-roll bar to the factory-welded crossmember mounts and are securely held by 3/8" socket-head bolts. Graphite-impregnated, black-urethane chassis bushings improve lubrication and isolate the anti-roll bar at the frame mounts. g-Machine anti-roll bars ship as complete kits with matte-black, powder-coat finish; alloy-steel zinc-plated hardware; and temperature-stable, chemical-resistant, Teflon® grease.

Part Number	Description	Price
6154-XX ¹	Anti-Roll Bar with Hardware, 1" g-Machine, Matte-Black Powder-Coat Finish	\$299. ⁰⁰
6155-XX ¹	Anti-Roll Bar with Hardware, 1-1/4" g-Machine, Matte-Black Powder-Coat Finish	\$339. ⁰⁰
Notes:		
1	"XX" in anti-roll-bar part number specifies outside width of crossmember (i.e., 6154-30 = 30").
