This spacer kit is for use with all Chassisworks Mustang II A-arm frames and chassis. Use the assembly drawing provided with the frame to verify dimensions.

1. The spacer location for the upper A-arm mounts are as follows: .77 long between the forward upper A-arm mounts; 2.105 between the forward A-arm mount and the adjustable upper shock mount; and 4.25 between the upper A-arm brackets. Use the all-thread to hold all the spacers together. The assembly sits on top of the frame, locate it per the assembly drawing provided with the frame and tack the brackets in place.

2. The spacer locations for the lower A-arm are as follows: between the forward lower A-arm brackets 1.625; between the two sets of lower A-arm brackets 8.625; and between the rear lower A-arm brackets 2.25. Again, use the assembly drawing provided with the frame to position the brackets under the frame.
